

# Men on the Move

Woodbury, NY | Beth Donner Design & Frank G. Relf Architect, P.C.

## Featured Products

**Interwoven  
Eco-Panels**  
WPVEP017

## Testimonial

**"Our design intent was to have an organic, tailored design that also played up the natural elements in the space.** Interestingly, when the client came in our conference room for the initial design meeting, they were so blown away by the **Interwoven Eco-Panels** in our office. We knew this was a great jumping off point, and the wood panels complemented the corrugated metals which provided the industrial vibe that was perfect for this moving and storage company.

**ASI is our go to when we are looking for unique and outstanding materials.** Integrating the Interwoven Eco-Panels in the common spaces and corridors allowed us to recess artwork and meaningful quotes with a totally seamless effect. **The ease of installation with the material was also a plus!"**
