Testimonial

"When Darden Restaurants embarked on a new prototype for the Olive Garden, their American/Italian casual dining chain, **an updated intimate and familial feel that makes guests want to spend time relaxing and sharing food with friends and family was envisioned.**

The **brand concept includes linear, dimensional, textured and customized wood panels on focal walls carried throughout the restaurant and is an impactful showcase for the arched booth design.** The wood panels are **also installed on the host stand** upon entering where the first impression is made and **memorable moments begin!**"
