Testimonial

"We designed all departments to transition smartly and smoothly one to the other. Using ASI's quilted **The Venue - Le Bain**, we were able to "soften" the hardness typical to reception desks and product shelves, while, at the same time, exhibit beautiful texture and absorb some of the foot traffic noise.

The variety and options offered by ASI, as well as seeing how the product is used on the website, made it an easy 'yes' for the client. **All of the ASI products are performing beautifully!"**
