Testimonial

"The **room design** was conceived around the **W narrative** for this property, which was: 'Union Square, where **Uptown meets Downtown**.' We needed to find materials to bring out a series of **deliberate clashes of design styles**. ASI was the logical first stop.

The quilted pattern from The Venue - Le Bain reminded me of a Chanel bag; sophisticated with a **high/low mix with a downtown sensibility**.

ASI helped us detail the most efficient and cost effective way to incorporate the materials. **Since our budget was limited, they made it possible to use this amazing product.**"
