Testimonial

"The intent was to create a focal wall and backdrop for custom logo signage to welcome patients entering the building. **Interwoven panels were the perfect way to incorporate warmth and natural elements into the design.** The product has a rich texture and provides depth to create visual interest. It is also simple to install, since this is an interlocking wood panel system.

The **ASI panels are beautiful and functional** and their team is always quick to answer questions and provide samples. They are an excellent resource to help make product recommendations and we have had successful collaborations in the past and look forward to future ones too!"
